

When I started my college, I was a bit reserved, but Dr D Y Patil SOE had a lion's share in the overall development of my personality. And this change did not happen overnight, the foundation for the same was laid by our great leader and Chairman, Dr Ajeenkya Patil sir. I was consistently encouraged and inspired by Dr. S S Sonawane sir and Dean Prof. A P Deshmukh sir.

We being the pioneer batch, there was a consistent thought running at the back of my mind, whether this newly found Institution could fulfill my ambitions, but as time passed by, I realized that my choice was not wrong. I came across some eminent faculties who willingly supported me during my academic projects. I was fortunate enough to visit many industries that helped me understand the practical aspects of what was actually taught in the class. Our college team had participated in various national technical events like Baja, Supra, and International Go-Karting Championship for the first time and this wouldn't have been possible without the college's management support. They were very cooperative and encouraged us to organize and participate in various activities that led to my all round development. Even though, I was studying Mechanical Engineering, I learnt the effective use of three vital resources in management viz. Men, Money and Minutes which are absolutely necessary in this interdisciplinary and competitive world. Both, the faculties as well as the staff members made the learning experience intellectual and enjoyable. We were not just trained technically but also spiritually my means of various lectures sessions that charged our minds. A beautiful campus and awesome sports facilities are an add-on to it.

Frankly speaking, you would find very few institutions beginning to excel in both academics and co-curricular. DYSPOE turned out to be an excellent launch pad for my future career as I would be pursuing a Master's of Science degree from Texas Tech University, Texas, USA. I would like to thank DYP SOE for the bottom of my heart.
